EKHO About Us

EKHO is a leader in the heart rate monitor, pedometer, stopwatch and pulse oximetry industry, striving to be a force in personal wellness, weight management and the fight against obesity. EKHO offers a clean and concise line of products that are affordable, easy to understand and simple to use. In addition, our full line of high-quality products are all covered by the best warranty in the industry.

EKHO is an advocate in implementing effective physical education programs that use fitness development tools to teach kids and adults about the importance of being healthy. EKHO monitors are used for health navigation across all ages and fitness abilities.

Finally, along with our stellar product line, we also believe in the ancient art of customer service, for which we continue to receive great praise.

Thank you for choosing EKHO.

Cory Mortensen
Director of Fitness Assessment

Comments

Great! You did it!

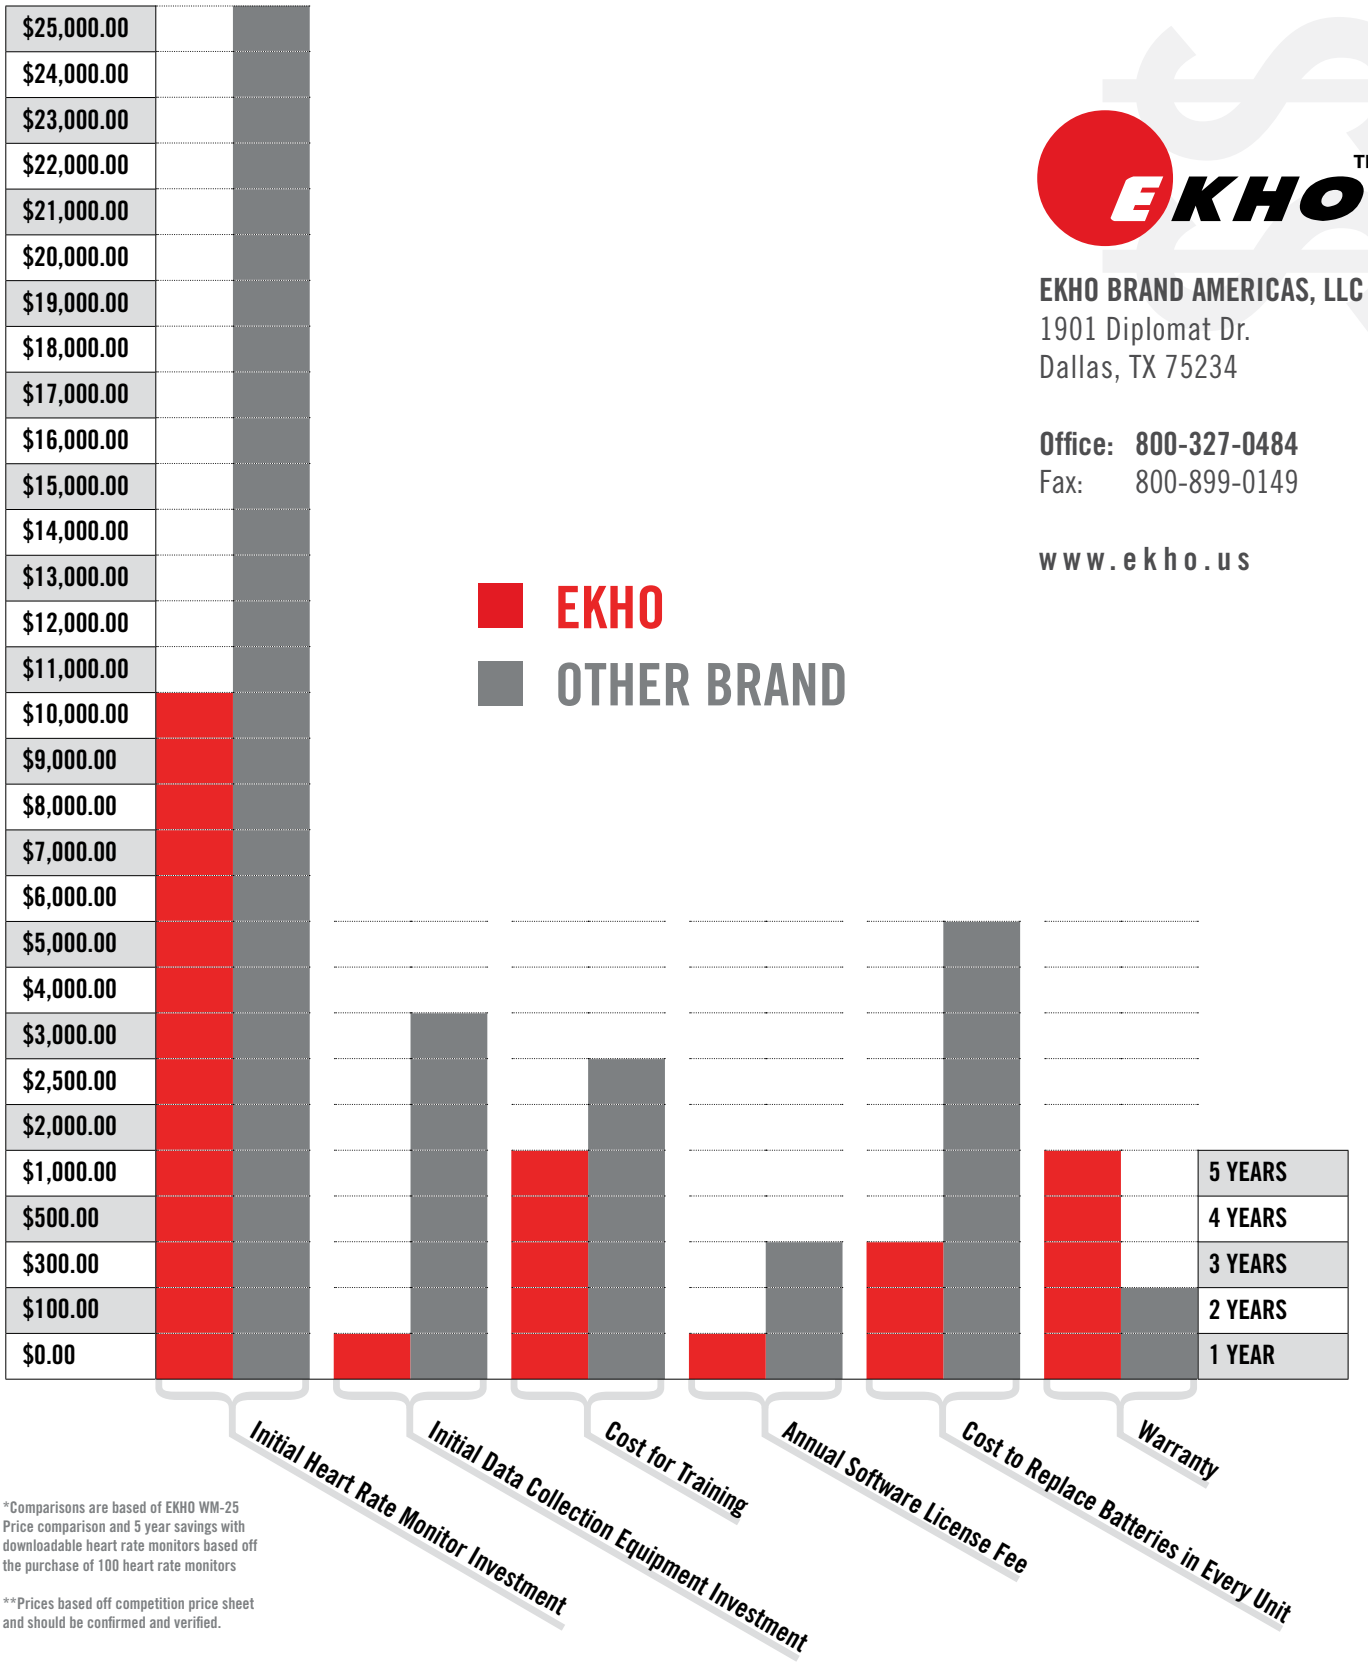
EKHO Team System:

- A fully integrated fitness solution that quickly and accurately records and measures fitness.
- Allows you to engage the students with video or Power Points allowing you to develop the fitness in the whole class while coaching the individual progress of each student.
- Develops individual ownership for their wellness.
- Provides individual training reports that can be emailed for the individual and group based on weekly or monthly reports for easy grading and feedback.

EKHO training experts are ready to work in collaboration with you and your administrative team, utilizing our extensive experience and industry leadership to ensure that your school, business or organization can successfully implement our fitness-based technology. Among the services and programs we offer are onsite training, informative regional workshops and comprehensive support.

To learn more about how EKHO fitness-based technology can empower your students and your clients to achieve their full potential, contact EKHO today.

EKHO School Cost Comparison



*Comparisons are based of EKHO WM-25 Price comparison and 5 year savings with downloadable heart rate monitors based off the purchase of 100 heart rate monitors

EKHO Heart Rate Monitors

EKHO fitness-products allow teachers to grade the students based on what they do, not how fast or how far they went. Physically speaking 100% is different for every student, EKHO helps teachers understand and grade those differences.

EKHO Heart Rate Monitors allow both the students and the instructors to get an accurate picture of the intensity of the student's workout. Many programs require the students to be at a prescribed target zone, signifying that they are maintaining a healthy heart rate while exercising.

EKHO fitness-based tools are simple and fun to use, providing instant feedback that safely motivates students at all athletic levels to constantly improve. For teachers, the data can be essential — enabling them to have accurate visual evidence of a student's progress daily and over the long term.

EKHO Heart Rate Monitors meet all the NASPE and PEP standards to ensure the success of your physical education program.

FIVE-YEAR WARRANTY
EKHO GUARANTEE OF QUALITY

EKHO E-10 HRM

EKHO E-10 is the world's simplest heart rate monitor. The same ECG-accurate heart rate reading found on all of our other models, with time and date.

E-10 FUNCTIONS

- Continuous Heart Rate
- Time & Date
- Water Resistant
- Large Display
- Ecg Accurate
- User Changeable Batteries
- Interfaces with Heart Rate Interactive Exercise Equipment

EKHO E-10 complies with the following NASPE Standards:

NASPE Standard 2 Grades 3-5:
Describe how heart rate is used to monitor exercise intensity.

NASPE Standard 4 Grades 6-8:
Self-assess heart rate before, during, and after vigorous physical activity.

E14-1137477	Class Pack with Aluminum Case	$54.95 EA
E14-1377224		$1,649.25 PACK OF 30

EKHO E-10, E-15. WM-25 and WM-28 FLASH come with:

EKHO TE-12 Transmitter Belt which interfaces with heart rate interactive exercise equipment

E14-1202168	TE-12 Transmitter w/ Elastic Strap	$49.95 EA
E14-1377122	TE-12 Elastic Strap	$9.95 EA

FIVE-YEAR WARRANTY
EKHO GUARANTEE OF QUALITY

EKHO E-15 HRM

The EKHO E-15 heart rate monitor makes listening to your heart easy and affordable, allowing you to focus on your workouts without worrying about complicated multi-functions.

E-15 FUNCTIONS

- Continuous Heart Rate
- Average Heart Rate
- Maximum Heart Rate
- Target Zone
- Out of Zone Visual Alarm for High/Low Target Zone
- Audible Alarm Off Mode
- Calories Burned
- Time & Date
- Stopwatch/Exercise Time
- Water Resistant
- Large Display
- ECG Accurate
- User Changeable Batteries
- Interfaces with Heart Rate Interactive Exercise Equipment

EKHO E-15 complies with the following NASPE Standards:

NASPE Standard 3 Grades 9-12:
Monitor physical activity through the use of a pedometer, heart-rate monitor, and/or physical activity log.

NASPE Standard 3 Grades 6-8:
Maintains a physical activity log for a seven-day period, documents progress toward achievement of personal goals.

NASPE Standard 4 Grades 3-5:
Maintains heart rate within the target heart rate zone for a specified length of time during an aerobic activity.

NASPE Standard 4 Grades 6-8:
Self-assess heart rate before, during, and after vigorous physical activity.

NASPE Standard 4 Grades 9-12:
Assesses physical fitness status in terms of cardio-respiratory endurance, muscular strength and endurance, flexibility and body composition.

NASPE Standard 4 Grades 9-12:
Demonstrates ability to monitor and adjust a personal fitness program to meet needs and goals.

EI4-1376919	Class Pack w/ Aluminum Case	$2,099.95 PACK OF 30

"At Thornwood High School, we use EKHO heart rate monitors on a daily basis. We currently use 140 WM-25s per class period and another 38 chest straps in our bike room. We have found that EKHO watches go above and beyond our expectations. The EKHO watches are the only watches that have shown the ability to withstand the constant stress placed upon them by our students every class period of every day. The students enjoy the easy to use features of the watches and are excited to see how many calories that they burned during their workout.

We actually started out using the "other" brand but found that the value and quality of the EKHO watches made them a much smarter choice for us to switch to. If anybody would ask, we highly recommend EKHO watches for any physical education department deciding to use heart rate monitors for their curriculum."

Jerry Styrsky
Thornwood High School
South Holland IL

EKHO GUARANTEE OF QUALITY

"What a pleasure it has been dealing with you and your organization. From the initial contact with Cory, the no run around approach was clear and evident. We had some time constraints and your company was prompt, efficient and made us feel like a long-time customer. Alisha was extremely helpful and supportive in making sure all of our needs were met.

Thank you for all of your help and we look forward to trying our new HRM's and Pedometers."

Mary Halbord

Activity and Steps Challenges

Trek the Great Wall of China – Hike to Florida this winter – Tour the national wonders….Activity and steps challenges are exciting wellness activities for everyone of all ages.

Weight Loss Contest

Nearly all preventable disease is reduced through weight loss. Make it fun with personal goal settings, anonymous competition and helpful weekly tips.

Targeted Nutrition

Make healthy eating fun and low calorie with a fruits and veggies challenge! Keep it fun with creative themes.

Family Fitness Challenge

Inspire a family fitness challenge, everyone matters, everyone succeeds.

BEE-FIT	Pedometers work by detecting vertical motion and hip movement. Pedometers count a step each time they detect this vertical change in direction. A horizontal arm bounces up and down inside the unit by a spring or thin wire. Their design is highly dependent on the placement on the waistband and keeping the pedometer vertical is vital. Tilting or wearing at an angle will affect pedometer accuracy drastically.					Accelerometers can be worn on the waist, on the wrist, in a pocket or hang from a lanyard around the neck (depending on the model). This sophisticated technology is user-friendly and offers greater motivation and goal setting tools for every walker. They are accurate, reliable and have no "clicking" sound.			

EKHO Pedometers are NECESSARY to comply with NASPE'S National Standards for Physical Education	
NASPE Standard 3 Grades 9-12	Monitor physical activity through the use of a Pedometer, Heart-Rate Monitor, and/or Physical Activity Log
NASPE Standard 3 Grades 6-8	Maintains a physical activity log for a seven-day period, documents progress toward achievement of personal goals
NASPE Standard 4 Grades 9-12	Demonstrates ability to monitor and adjust a personal fitness program to meet needs and goals

EKHO Pedometer Activity Packs

Whether your school is just beginning to use pedometers for physical education or you need to expand your existing program, EKHO Pedometer Activity Packs make it easy with everything you need in one convenient package.

EKHO Pedometer Activity Packs include:

- Your Choice of Pedometers
- Each Case Holds up to (32) EKHO Pedometers
- Loss Prevention Straps
- Storage Case (Free with an Order of 32 Units or More)

Physical fitness is the key to living a healthy life, no matter what corner of the globe you are from. EKHO is a proud leader and supporter of personal, educational and institutional fitness programs in over 20 countries

EKHO ONE WORLD, ONE CHOICE

Global Sustainability Challenge

An average world citizen contributes 4.2 metric tons of carbon dioxide to the environment each year. In the United States it's an average of 19.5 metric tons. Much of this results from decisions we make every day. These decisions cost us money and impact our health and contribute to global warming.

Join EKHO in reducing our environmental impact by choosing to walk to a healthier you and healthier planet - track your carbon footprint using EKHO Pedometers and Accelerometers.

Did you know:

- About 15 percent of all trips in the U.S. are less than one mile long, and more than 50 percent of those are made by car. Drive 10 fewer miles each week and you'll reduce the pollution that causes global warming by more than 500 pounds a year.
- If Americans walked just 30 minutes a day instead of driving, we'd save about 8.4 billion gallons of gasoline a year and reduce emissions of carbon dioxide by 82 million tons.
- If for one year, 10,000 people hoofed it five miles a week instead of driving, we'd eliminate the CO2 created by 219 cars.
- Walk three miles a day and you'll burn about 240 calories — about the amount in a Snickers® bar — while likely lowering your blood pressure and blood-sugar levels, which helps protect you against diabetes and heart disease.

PULSE OXIMETERS

EKHO™

PULSE OXIMETERS

P-950 Pulse Oximeter

EKHO

SpO2
Measuring Range 35”99%
Accuracy +/- 3 digits at 70–75%
+/- 2 digits at 75–99%

Pulse Rate (PR)
Measuring Range 30–240 bpm
Accuracy +/- 2 bpm

Perfusion Index (PI)
Display Range 0–20%

Preset Alarm Units
SpO2 Alarm Low Limit 90%
PR Alarm High Limit 120 bpm
Low Limit 50 bpm

Environment Requirement
Operating Temperature 5–40° C
Operating Humidity High Limit 120 bpm
Atmospheric Pressure Low Limit 50 bpm

Performance
Surround Light Interference: The difference between the SpO2 value measured in the condition of indoor natural light and that of a darkroom is less than +/-1%.

50Hz / 60Hz Interference: SpO2 and PR are precise which have been tested by BIO-TEK pulse oximeter simulator.

Low Perfusion Condition: The accuracy of SpO2 and PR measurement still meet the precision described above when the modulation amplitude is as low as 0.6%.

FDA Approved

The EKHO P-950 Fingertip Pulse Oximeter is a simple non-invasive digital device that indirectly measures the oxygen saturation of a patient’s blood (SPO2). Perfect for EMS, visiting nurse, or wherever portability is required.

“My mission with EKHO is to bring necessary products such as the portable pulse/ox and heart rate monitor to parents and caregivers of chronically ill children to ease their fear at home and give them one more tool that empowers them to feel more in control. I am a mother to 2 cardiac children, who have asthma. And my EKHO Pulse Oximeter has already saved my daughter’s life. I travel with it all the time.”

EKHO H-200 Scale with Body Fat Monitor

EKHO H-200 provides greater control over monitoring and improving health and fitness, as well as, essential information for you to use while setting goals, for staying healthy and living a more active, vital life.

EKHO H-200 Body Fat / Body Water Monitors use a method of Bioelectrical Impedance Analysis (BIA), a highly reliable method of analyzing body composition that can be done at home in a matter of seconds. BIA is based on a person's height, weight and the strength and speed at which a safe, low-level electrical signal passes through the muscle and fat in the body. Electrodes built into the patented "foot-pads" send the signal through the body.

FIVE-YEAR WARRANTY
EKHO GUARANTEE OF QUALITY

H-200 FUNCTIONS

- Easy to Read Large Digital, Dual Display
- Personal Profile Set-Up and Memory
- 10 Person Profile Memory
- Displays Body Fat Percentage
- Measures Body Fat Hydration, Muscle and Bone
- Rate Graduation: 0.1%
